

Learning
Today,
Leading
Tomorrow

**THE JOURNEY OF
A THOUSAND MILES
BEGINS WITH
A SINGLE STEP.**

History

The school has a rich legacy of over a 100 years. Situated right on the seashore amidst natural surroundings at Umbergaon, Gujarat, the school teaches in both English & Gujarati. The Agratha Academy, currently recognised by the State of Gujarat is proposing to seek affiliation with Central Board of Secondary Education (CBSE) in the coming years. This is a contemporary urban school, spread over 8 acres of land.

WE AIM TO PROVIDE :

1. Opportunities for our students, which are a perfect blend of curricular and co-curricular studies such as cultural and sports education.
2. Developing environment which acts as a catalyst for them to grow intellectually, artistically, athletically and morally.
3. Taking up programmes and initiatives that gives every child a chance to outperform, explore and grow.

**WITHIN THE
CHILD
LIES THE FATE OF THE
FUTURE.**

Ideology

Our kids are living in a complex world that has made life easier for them, but highly competitive. The traditional ways and means of scoring marks in an examination have ceased to exist because we cannot ignore the growth of the digitalised world around them. So, the critical question we face as adults is, how are we going to prepare our kids for such a world ?

It's a vast horizon and there is no pathway that is specially carved for any student to face the future creatively and courageously. These pathways need to be created for them by promoting the opportunities that unleash the potential present in them. So to speak, our kids are caged tigers and we need to release them to conquer the world. So that, it gets easier for them to make the quantum leap in that road less travelled. To achieve this, it is essential that their school exposes them to everything that helps them succeed.

**NURTURING
DREAMS
INSPIRING
FUTURES.**

"Before you are a leader, success is all about growing yourself.
When you become a leader...

Success is all about growing others!"

MISSION:

To nurture the innate potential of our students and mould them into passionate, committed, competent, and value-based individuals with leadership qualities. The philosophy of our school is "Leaders are made, not born" and it will focus on developing a person capable of providing the kind of leadership our society needs.

VISION:

The Agratha Academy comes to you with an enlightened thinking process, which is seriously involved in spotting the inner talents and capabilities of your kids to face the realities squarely. We aspire for each of our student to move ahead in life passionate, committed, competent, with a strong value system and defining leadership qualities.

The vision of the school is "Every day, Every moment, Every Student - Evolving Leaders."

EVERY GREAT LEADER HAS TO
START SOMEWHERE.
START BEING A LEADER
WITH US.

Why Us?

We, at "The Agratha Academy", aim at providing its students a learning experience that will remain with them for life. The young men and women who will walk out of our gates will truly stand out as global citizens. We ensure that they would not just be proficient, but will also be compassionate towards all that they pursue. We will also make sure that they are filled with the eagerness to be an integral part of the futuristic India.

What makes us "us", is what separates the children from the ordinary. We strive to ensure that the environment here revolves around the children and their needs; challenging them to move beyond their limits. Here, they will learn to push themselves to take responsibility for their own growth, which, in a way, will allow their creative expressions to flow out efficiently. We work diligently towards building a community of leaders, ready to take charge and shape the future of our society.

Future Agraneeyas will have qualities abound.

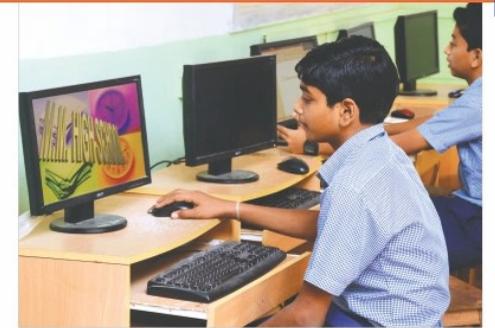

- ☑ They would be outspoken and communicative, and at the same time, attentive listeners.
- ☑ They would be pragmatic and adept at accustoming themselves to face the world today and to create tomorrow's world for themselves.
- ☑ They would be Indian-bred, global citizens, and will be able to look beyond boundaries with a welcoming attitude to embrace the warmth and offerings of the world.
- ☑ They would have the power of discernment, to differentiate between the right from the wrong and to make informed choices.
- ☑ Respect for the environment and surroundings with an informed desire to preserve nature will thrive in each child.
- ☑ They would excel academically, trained to adapt their capabilities to always emerge as a winner.
- ☑ Instilled in each child will be the universal values of 'Love, Truth and Tolerance'.
- ☑ They will be an Agraneeya for life; a forerunner in whatever they do and the world would follow.

**BUILDING A GEM
STARTS WITH
BUILDING
OURSELVES
FIRST.**

Infrastructure & Facilities

We realise the importance of a conducive environment, essential for a child's mental development. We gave priority to this thought while structuring our campus. After detailing a well thought-out space, we have built classrooms and the overall infrastructure in a way that augments both, the learning and the teaching. The theme running through the institution is one that bows down to the 'Panchatatwa' of the universe, or the 5 elements from which life evolves. It's a well laid-out plan in all aspects and succeeds in an excellent, overall development of the student.

The Agratha Academy automates routine and intellectual labour through the course of each day through an informative and enriched library, thoughtfully-envisaged laboratories coupled with comfortable student friendly furniture. To stay at par with the technological development in the world today, we also provide, both, the teacher and the student with Wi-Fi access to ensure neither have a back-foot in learning.

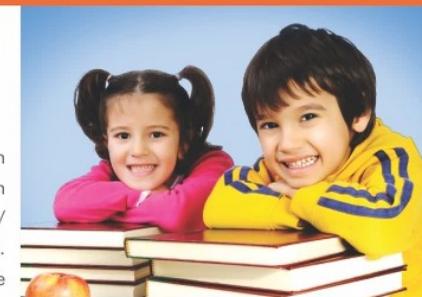

A hungry stomach and a focused head work together. To ensure our students are healthy and sitting in class with full stomachs, we have built a canteen which is clean and hygienic. This would provide the children with scrumptious meals to ensure a balanced diet.

**WE DON'T TEACH
TO LEARN.
WE TEACH
TO THINK.**

Academics & Curriculum

The most important goal of education is to form a strong foundation to ready a child to take on the world. Our curriculum has been written down in a way that doesn't burden the child. Instead, it encourages him / her to retain a thirst for knowledge through all his / her years at Agratha. All students are given equal attention in the classroom and the same opportunities to grow and excel together.

Only quality teaching can facilitate this and our staff is adept at providing the children with a value-driven education which encourages them to deepen their critical thinking abilities.

Our students emerge as well-aware, cultural and pragmatic individuals. Along with the help of our staff and parents we shape each child mentally, emotionally and socially. So that, no obstacle stands in between them and their dreams.

Our core values - Knowledge, Respect, Social responsibility, Creativity and Celebration - are inculcated in each pupil.

How we make a child, an extraordinary child.

We endeavor to prepare our students to make a mark on the global village that the world has become today.

Our success in achieving these goals will be bolstered by a dedicated and talented faculty, as well as extensive, state-of-the-art facilities for nurturing and honing creative and athletic talent. The school will continuously strive to encourage and promote all activities connected with and allied to education, culture and sports.

We will also cultivate a culture of reading, thinking and reflecting, which will encourage life-long learning. Each child will be respected for his/her unique set of competencies and therefore, distinctive academic programmes and innovative teaching methodologies will be introduced to encourage students to develop critical-thinking and learning through enquiry and reason.

All in all, we are resolved to focusing on the development of the "whole child."

**WORK
HARD.
PLAY
HARDER.**

Beyond Academics

We strongly believe in the all-round development of a child. Bounding one to four walls with only books for company cannot cultivate a multifaceted individual. Our infrastructure boasts of play areas, sports amenities and extra curricular classes for enhancing creativity. A student here can indulge in drama, elocution, music, handicraft – whichever intrigues the child's curious mind.

We will hold our students' hands till the very last step by educating and mentoring them about the career choice which may lie ahead of them to make sure that they are well taken care of in a world waiting for their guidance. A bright future with endless possibilities beyond the gates of Agratha.

While enrolling your little gem, be assured he/she will be well taken care of and will always be given first priority at Agratha. Here, our whole community shines together.

Our second step in building your child.

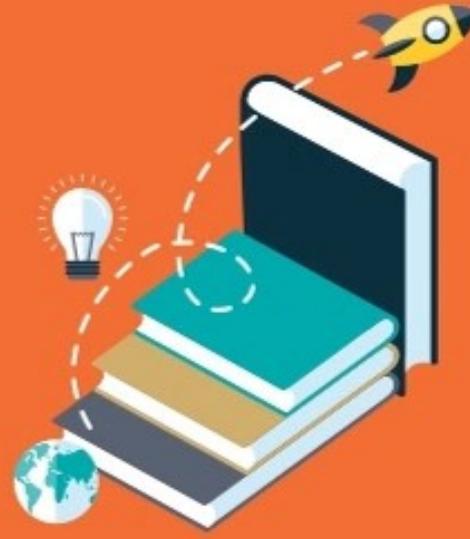

Various programmes will be designed to provide our students with an opportunity to have enriching experiences beyond the normal school day. The primary goal of these programmes is for students to have fun while learning and mastering important life skills. The programs will not just be competitively driven but will also focus on exposing students to new experiences and enriching their lives. This will allow every student to both, actively participate in areas they are already passionate about and discover new ones.

The essence of the above commitment by The Agratha Academy is born out of the fundamental convictions of the management in shaping the future generations. The efforts that are put in these directions are essentially to make our kids familiar with the unfriendly terrains of tomorrow and prepare them to face the economic, social and intellectual challenges in a very professional way. We would educate the kids to a world of hope, enthusiasm and assume leadership roles.

Agraneeya would emerge as a true citizen of India with his feet firmly rooted in our culture.

LET THE JOURNEY OF AGRANEEYAS BEGIN.

We welcome all parents to willingly entrust their child in our care and we promise to give them a schooling that will enable them to compete globally, making them responsible citizens.
